* and **

* Comment. According to the present report, a total of 1,354 freight cars loaded with Soviet supplies passed through the Frankfurt/Oder marshaling yard during the period from 1 January through 26 February 1952. 1,561 freight cars for the same period. Several supply shipments contained in previous information were not mentioned in the present report, but some shipments were probably reported twice in other reports, and identical shipments are reported but with slightly differing numbers of cars. It is believed that the actual number of carloads of supply goods entering the zone during the reported period was between the figures mentioned, i.e. about 1,450 cars, or a daily average of one train of 25 freight cars. It is believed that the present report completely covers ammunition shipments. However, there are considerable discrepancies with regard to shipments of military equipment. According to the present report, 114 tanks arrived during the period under review, but only 40 tanks crossed

the border during this period. However, from the dates, [REDACTED]
[REDACTED] the consignees of 32 carloads, which were
reported [REDACTED] as military goods, it is possible
to deduce that these shipments were actually tanks. The remaining
42 flatcars which, according to the present report, carried tanks,
were actually loaded with vehicles, aircraft and other military
equipment. [REDACTED]
